

# Minghao Guo

## PERSONAL INFORMATION

---

|           |   |          |   |
|-----------|---|----------|---|
| Name:     |  Minghao Guo (郭明浩)             | Address: |  Peyton Hall, Princeton University,<br>Princeton, NJ 08544, USA |
| Email:    |  mhguo@princeton.edu           | GitHub:  |  mh-guo   |
| Homepage: |  mh-guo.github.io              | GitLab:  |  mhguo  |
| ORCID:    |  orcid.org/0000-0002-3680-5420 |          |   |

## EDUCATION

---

|   |                      |
|---|----------------------|
| <b>Princeton University</b>   | Princeton, US        |
| Graduate Student, Department of Astrophysical Sciences                        | 2021 – Expected 2026 |
| • Thesis: Multiscale multiphase modeling of black hole accretion and feedback |                      |
| <b>Princeton University</b>   | Princeton, US        |
| Master of Arts, Department of Astrophysical Sciences                          | 2021 – 2023          |
| <b>Peking University</b>  | Beijing, CN          |
| Bachelor of Science in Physics, Yuanpei College                               | 2016 – 2021          |
| • Thesis: A numerical study of scalar-tensor gravity theory                   |                      |

## EXPERIENCE

---

|   |                           |
|---|---------------------------|
| <b>Institute for Advanced Study</b>                   | Princeton, US             |
| Visiting Graduate Student, School of Natural Sciences | Dec. 2023 – Expected 2026 |

## RESEARCH INTERESTS

---

- Black holes, high energy astrophysics, accretion disk, general relativistic magnetohydrodynamics (GRMHD)
- Active galactic nuclei (AGN), galaxy formation and evolution, multiphase interstellar medium (ISM)
- Numerical methods and simulations, GPU computing, new numerical techniques
- Neutron stars, pulsars, gravitational waves, modified gravity theory

## PUBLICATIONS

---

See [ADS](#), [Google Scholar](#), or [ORCID](#) for full list. First-author citations: 150

## APPROVED PROPOSALS

---

|   |                       |
|---|-----------------------|
| <b>NSF ACCESS Maximize</b> (PI: Eliot Quataert)                                       | ~ 100 k GPU hours     |
| Investigating stellar and black hole heating in massive galaxies, groups and clusters | Oct. 2025 – Sep. 2026 |
| <b>EuroHPC</b> (PI: Volker Springel)  | ~ 1 M GPU hours       |
| Multi-scale (GR)MHD modelling of accretion onto supermassive black holes              | Mar. 2024 – Jun. 2025 |
| <b>NSF ACCESS Maximize</b> (PI: Eliot Quataert)                                       | ~ 100 k GPU hours     |
| Investigating stellar and black hole heating in massive galaxies, groups and clusters | Oct. 2024 – Sep. 2025 |
| <b>JWST Cycle 3</b> (PI: Julie Hlavacek-Larrondo)                                     | ~ 6 hours             |
| Mapping a Black Hole Accretion Flow with JWST/NIRSpec                                 | 2024 – 2025           |
| <b>NSF ACCESS Accelerate</b> (PI: James M. Stone)                                     | ~ 42 k GPU hours      |
| Multiscale GRMHD Modeling of Accretion onto Supermassive Black Holes                  | Nov. 2023 – Feb. 2025 |
| <b>NSF ACCESS Explore</b> (PI: Minghao Guo)   | ~ 10 k GPU hours      |
| Multi-scale MHD Modeling of Accretion onto Supermassive Black Holes                   | Jun. 2023 – Jun. 2024 |

## HONORS AND AWARDS

---

|  |           |
|--|-----------|
| Princeton First Year Fellowship in Natural Science & Engineering | 2021      |
| Weiming Bachelor, Peking University                              | Jun. 2021 |
| Yuanpei Outstanding Young Scholars                               | Dec 2020  |
| Lin-bridge First Prize for Undergraduate Research                | Sep. 2020 |
| Yuanpei College First Award for Undergraduate Research           | Jun. 2020 |
| Xingcheng Award for Undergraduate Research                       | May 2019  |
| National Undergraduate Research & Training Program               | May 2019  |
| Peking University Scholarship for Outstanding Freshmen           | Sep. 2016 |

## TEACHING AND MENTORING

---

|   |             |
|---|-------------|
| Co-advising Princeton Undergraduate: Milo Salvucci  | 2025        |
| Teaching Assistant for Cosmology  | Spring 2024 |
| Teaching Assistant for General Relativity   | Fall 2023   |
| Co-advising Princeton Undergraduate: Sajia Shahrin Neha   | 2023        |
| Lecture on Flatiron Institute CCA Fluid Dynamics Summer School<br><i>GPU Computing using AthenaK: Black Hole Accretion and Supernova Remnants</i> | Aug. 2023   |

## SERVICE AND OUTREACH

---

|  |                 |
|--|-----------------|
| Reviewer for the Astrophysical Journal (ApJ)   | 2024 – Now      |
| <a href="#">Prison Teaching Initiative</a><br>Teaching Astronomy                               | Jan. 2025 - Now |
| Member of the Learning the Universe Collaboration  | Sep. 2022 – Now |
| <a href="#">Astronomy on Tap Trenton: How does a tiny black hole affect the entire galaxy?</a> | Mar. 2025       |
| Member of the Local Organizing Committee, Learning the Universe Collaboration meeting          | Mar. 2025       |
| Member of the Mental Health Working Group  | 2023 – 2024     |
| Co-organizer of the Princeton Astrophysics Thunch, Astronomy                                   | 2022 – 2023     |

## TECHNICAL SKILLS

---

**Programming:** Proficient in Python, C/C++, L<sup>A</sup>T<sub>E</sub>X, Mathematica, Git; Basic knowledge of Matlab, Fortran, and HTML/CSS.

**Software and Packages:** AthenaK, Athena++, MPI, OMP, cuda, SymPy, yt, emcee, VisIt, ParaView, PLUTO, IRAF, GALFIT

**Techniques:** Numerical simulations, massive parallel computing on supercomputer, dataset analyzing and visualization.

## SOFTWARE DEVELOPMENT

---

- [AthenaK](#) (Developer): Block-based AMR framework with fluid, particle and numerical relativity solvers in Kokkos.
- [AthenaKit](#) (Owner): Toolkit for analysis and visualization of simulations by AthenaK
- [pySTGROMX](#) (Owner): Extended reduced-order surrogate models for scalar-tensor gravity of Damour and Esposito-Farèse (DEF)

## PRESENTATIONS AND CONFERENCES
